

Universal Radiator Mount Kit

INSTRUCTIONS

The following instructions and templates are designed for use with Allstar Performance radiators. Brackets may require modification when using other manufacturer's radiators. A template is included to assist in notching the bracket for an Allstar radiator outlet, this is only a guideline and measurements should always be taken to assure a proper fit.

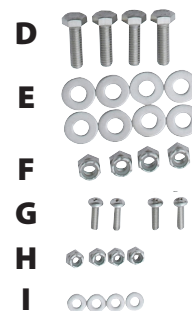

1. Verify all pieces are included using contents list.
2. Choose the appropriate Template for a passenger side or drivers side outlet radiator, (see page 2 of instructions).
3. Cut out Template and position on Cradle Support [A or B] according to next step.
4. Cradle Supports [A & B] have a flat edge and an edge with a 90 degree angle for securing to Angle Brackets [C]. Place the Template on the flat edge of the Cradle Support and secure in place.
5. Use a 2" hole saw to drill the hole in the Cradle Support using the Template as a guide for lower radiator outlet.
6. Additional trimming around hole may be required to allow Cradle Support to slide onto the radiator tank.
7. Cradle Supports [A & B] and Angle Brackets [C] are not predrilled. This kit is designed to fit a wide range of vehicles and will require drilling once proper mounting positions are determined.
8. Position and mount Angle Brackets [C] to Cradle Supports [A & B] by drilling four 3/16" holes and install with provided hardware [D, E, & F].
9. Lastly, position and drill four 5/16" mounting holes in the Angle Brackets [C] and fasten radiator to the radiator support using included hardware [G, H, & I].

KIT CONTENTS:

- A. Cradle Support (LH) Driver Side, (x1)
- B. Cradle Support (RH) Passenger Side, (x1)
- C. Angle Bracket (x2)
- D. Bolt, 5/16"-18 x 1" (x4)
- E. Flat Washer, 5/16" (x8)
- F. Locking Nut, 5/16"-18 (x4)
- G. Bolt, 10-32 x 5/8" (x4)
- H. Locking Nut, 10-32 (x4)
- I. Flat Washer, 10-32 (x4)
